## artist spotlight

## Majai

**Majai** are the latest addition to the fast-burgeoning and ever more impressive **Tetsuo Records** roster. Pairing the twin talents of Washington DC resident MK (the producer & DJ) and Belarusian composer & vocalist Anna Sennikova, they meet musically somewhere over the Pacific Ocean. That's the geographical ethos anyway, the pair actually first met in on good old terra firma, in MK's home city in late 2001!

It wasn't until 2007 that the pair hit their production stride though with the release of 'Lightwave'. A superbly chilled-out downbeat number that was taken floor-bound courtesy of a furiously kicking rework from Airbase. '**Phoria**', their first outing for Tetsuo followed hot on its heels last year. A track that went on to score major floor points from the likes of Tiësto, Armin, Ferry and Above & Beyond.

This month they are back with the lush, languid, Med-influenced 'Strange'. Alongside the chilled, lush melodies of the Anna & MK's original version, you have 9 (count 'em up!) remixes options; something we confidently predict to suit any trance or progressive taste. Re:Locate, Nitrous Oxide, Cressida, DJ Preach and Tetsuo mastermind Talla's 2XLC versions are all out, about and on heavy remix maneuvers in support of the track and doing comparably fine things.

You can wrap your (hopefully suitably peeked) ears around '**Strange**' now by [clicking here](#). The track is out on **Tetsuo** on vinyl on the 13th of July with the download going online on the 24th, which will be available through Beatport.
